## “Rewriting the Rulebook: How AI is Transforming Organizational Compliance”

In today's rapidly evolving digital landscape, compliance with regulations and ethical standards has become more complex. Organizations face increasing scrutiny in data protection, financial regulations, workplace safety, etc. Artificial Intelligence (AI) offers groundbreaking solutions to enhance compliance management—automating monitoring, detecting risks, and improving decision-making.

**This webinar aims to explore the role of AI in transforming compliance practices across industries, highlighting key challenges, opportunities, and innovations.**

### Welcoming speech

**Ridwan Hendra**  
 Chairman  
 Institute of Compliance Professional Indonesia (ICoPI)
