Risk Odyssey: Engineering Momentum, Building a Resilient Risk DNA

Risk Beyond 2025 International Conference on Enterprise Risk Management is the 15th ERMA annual conference in Indonesia. This year's Risk Beyond Conference, titled "Risk Odyssey: Engineering Momentum, Building a Resilient Risk DNA," explores the evolving journey of risk management in an increasingly dynamic world. As organisations face fast-changing environments—from technological disruptions and geopolitical instability to climate volatility and stakeholder expectations—the need for a resilient risk DNA is more urgent than ever.

The theme underscores two critical imperatives:

- **Engineering Momentum** – The strategic push to embed risk thinking across all layers of the organisation, using data, design, and leadership to accelerate preparedness.
- **Building a Resilient Risk DNA** – Moving beyond compliance into culture, capability, and adaptive systems that can evolve, absorb shocks, and seize opportunities.

Risk Beyond 2025 provides you a broad scope of insight in various issues, challenges, and cases that can be applied in real world settings. In addition, this event will also facilitate discussion and practice sharing about the situations that have been and will be faced from several different perspectives with their own experiences and approaches towards them, including regulators, policy makers, organizations, professionals, academicians, and society.

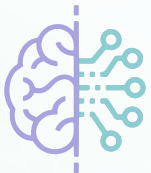

This event introduces a variety of topics such as:
